

PROTECT FROM FREEZE

**AVAILABLE
NOVEMBER 1
TO APRIL 15**

FREIGHT PROTECTION THAT DOESN'T FREEZE UNDER PRESSURE

WHEN TEMPERATURES DROP, YOUR FREIGHT KEEPS MOVING

Don't let harsh Northeast weather hit your bottom line. Damaged goods, shipping delays, and suspended services cost you money and your reputation.

CHOOSE PROTECT FROM FREEZE

When winter strikes, freight keeps moving with the use of heated trailers engineered to keep temperatures inside the trailer above 32 degrees.

Other carriers put sensitive freight at risk by relying on passive thermal methods, such as insulated blankets. These methods don't offer enough protection in cold climates.

Backed by a 99.99% exception-free record, your sensitive freight is continuously monitored and fully protected from freezing throughout the entire transit process.

THE GOLD STANDARD IN FREEZE PROTECTION

Pyle powers through when others stand still. Keep business moving, minimize claims, and maximize customer confidence.

Because your business doesn't wait for better weather, and neither should your freight.

THE NORTHEAST'S MOST RELIABLE WINTER LTL CARRIER

Heated Trailers, Not Blankets

Secure your sensitive freight the right way, in motion and at rest.

No Embargoes. No Delays

Keep your freight moving year-round, even when others suspend service.

Experience You Can Count On

Rely on decades of transportation excellence in harsh climates.

PROTECT FROM FREEZE

**Simply mark "Protect From Freeze" on the Bill of Lading,
and the service will be added.**
